

Undergraduate Medicine — Clinical Pearls

CharaNas — Undergraduate Medicine Department

Study aid only. Confirm with your faculty curriculum and recommended textbooks.

1. ABCDE approach in emergencies: Airway, Breathing, Circulation, Disability, Exposure.
2. Chest pain differentials: ACS, PE, aortic dissection, pneumothorax, pericarditis, GERD, MSK.
3. Sepsis: infection + organ dysfunction; early cultures, antibiotics, fluids, source control.
4. DKA: hyperglycemia + ketones + acidosis; treat with fluids, insulin, K+ monitoring.
5. Postpartum hemorrhage 4 Ts: Tone, Trauma, Tissue, Thrombin.
6. Always correlate history, exam, labs, and imaging — avoid isolated lab interpretation.
