

# Undergraduate Medicine — Pathology Quick Notes

CharaNas — Undergraduate Medicine Department

Study aid only. Confirm with your faculty curriculum and recommended textbooks.

1. Inflammation cardinal signs: rubor, tumor, calor, dolor, functio laesa.
2. Apoptosis: programmed cell death (caspases); necrosis: uncontrolled cell death with inflammation.
3. Neoplasia hallmarks: sustained proliferation, evade growth suppressors, resist apoptosis, invade/metastasize.
4. Atherosclerosis: endothelial injury → lipid accumulation → foam cells → fibrous plaque.
5. Type I hypersensitivity: IgE-mediated (anaphylaxis, asthma); Type IV: T-cell mediated (TB skin test).
