

Undergraduate Medicine — Cardiology Notes

CharaNas — Undergraduate Medicine Department

Study aid only. Confirm with your faculty curriculum and recommended textbooks.

1. ACS spectrum: unstable angina, NSTEMI, STEMI — treat as time-critical.
2. STEMI: ST elevation in contiguous leads $\pm$ new LBBB; urgent reperfusion.
3. HF signs: orthopnea, raised JVP, crackles, edema; confirm with BNP/echo.
4. MR = holosystolic to axilla; AS = crescendo-decrescendo to carotids.
5. Secondary prevention after MI: antiplatelet, statin, beta-blocker, ACEi as indicated.
