

Undergraduate Medicine — Nephrology Notes

CharaNas — Undergraduate Medicine Department

Study aid only. Confirm with your faculty curriculum and recommended textbooks.

1. AKI types: pre-renal, intrinsic (ATN/AIN/GN), post-renal.
2. Nephritic vs nephrotic: active sediment/HTN vs heavy protein/edema.
3. Diabetic kidney disease: ACEI/ARB cornerstone with glycemic/BP control.
4. eGFR guides drug dosing and CKD staging.
5. Hyperkalemia emergencies: ECG changes → calcium, shift, remove K⁺.
