

Undergraduate MLS

Immunology & Serology Study Pack

CharaNas MLS — Specialty Notes

Expanded notes with original schematic figures for revision. These are educational drawings inspired by standard undergraduate teaching themes, not copied textbook plates. Always follow your faculty curriculum and latest guidelines.

Section	Focus
1	Core concepts in Immunology & Serology
2	Preanalytic and specimen issues
3	Analytic methods and interpretation
4	Quality, safety and communication
5	Checklist and book anchors
6	Quick pearls from these notes
7	Recommended book sources

1. Core concepts in Immunology & Serology

High-yield undergraduate themes in immunology & serology for exams and lab practice.

Connect specimen quality → method → result → clinical action.

Patient safety, biosafety, and quality systems are inseparable from MLS work.

Figure: Serology algorithm idea

Follow published algorithms (HIV, syphilis, etc.) — not a single test alone

Schematic figure for learning — verify details in your recommended textbooks.

Revision prompts

- Explain this section aloud in 60 seconds as if teaching a junior student about immunology & serology.
- List 3 red flags that would make you escalate care urgently.
- Name 2 investigations and 2 initial management steps you would consider first.

2. Preanalytic and specimen issues

Recognize common preanalytic traps that distort immunology & serology results.

Correct patient ID, collection, timing, and transport prevent false crises.

Know when to reject, redraw, or add a comment instead of releasing numbers.

Revision prompts

- Explain this section aloud in 60 seconds as if teaching a junior student about immunology & serology.
- List 3 red flags that would make you escalate care urgently.
- Name 2 investigations and 2 initial management steps you would consider first.

3. Analytic methods and interpretation

Method principles, limitations, and interferences matter as much as the value.

Use reference ranges and critical values appropriate to your analyzer and population.

Pattern recognition beats memorizing isolated cutoffs.

Figure: Serology algorithm idea

Follow published algorithms (HIV, syphilis, etc.) — not a single test alone

Schematic figure for learning — verify details in your recommended textbooks.

Revision prompts

- Explain this section aloud in 60 seconds as if teaching a junior student about immunology & serology.
- List 3 red flags that would make you escalate care urgently.
- Name 2 investigations and 2 initial management steps you would consider first.

4. Quality, safety and communication

QC failures, critical calls, and biosafety events need clear SOPs.

Document corrective actions; verify before returning to patient testing.

Communicate urgent and unexpected findings promptly and clearly.

Revision prompts

- Explain this section aloud in 60 seconds as if teaching a junior student about immunology & serology.
- List 3 red flags that would make you escalate care urgently.
- Name 2 investigations and 2 initial management steps you would consider first.

5. Checklist and book anchors

Checklist: ID → specimen integrity → method/QC → interpret → report/escalate.

After reading, practice with the MCQs and cases for active recall.

Primary references: Clinical immunology texts; Henry's; assay IFUs.

Revision prompts

- Explain this section aloud in 60 seconds as if teaching a junior student about immunology & serology.
- List 3 red flags that would make you escalate care urgently.
- Name 2 investigations and 2 initial management steps you would consider first.

6. Quick pearls

High-yield reminders packaged with this specialty in CharaNas:

1. Sensitivity vs specificity vs PPV/NPV depend on prevalence.
2. Syphilis algorithms: nontreponemal + treponemal confirmation themes.
3. HIV testing follows staged algorithms — do not stop at one reactive.
4. ANA patterns guide follow-up antibody panels.
5. Heterophile antibodies and cross-reactivity cause false results.
 - Link symptoms → anatomy/physiology → investigation → first management step.
 - Write one OSCE-style explanation for a common presentation in this specialty.
 - After reading, do the Short MCQ and Case-based Question for active recall.

7. Recommended book sources

Standard undergraduate references commonly used internationally. Use the edition your college recommends. Figures in commercial textbooks are copyrighted; use library/licensed access for full plates and photographs.

#	Reference
1	Clinical Immunology textbooks
2	Henry's Clinical Diagnosis
3	Assay package inserts / IFU

How to study with this PDF: read one section → sketch the figure from memory → answer the MCQs/cases → review mistakes → revisit the matching section.
